EMPLOYMENT HISTORY

Jun 2023 — Jun 2024   **Front-end Developer, Kaiber**   New York City

- Developing and maintaining web applications using React JS and other related technologies.
- Continuous Integration and Deployment
- Implement code splitting techniques to improve load times by splitting the code into smaller bundles.
- Communicate with backend services via RESTful APIs to fetch and update data.
- Configure Redux in the project, including setting up the store, middleware, and integrating it with React using the react redux library.
- Create action types and action creators to define the ways in which the application's state can be updated.

Jun 2021 — Jun 2024   **Front-end Developer, Pixelbot**   600-212 King St. W., Toronto, ON, Canada

- Development and Maintenance of Components using React JS and other related technologies.
- Integration and Communication with APIs
- Translate UI/UX designs into React components, ensuring pixel-perfect implementation and responsiveness.
- Use tools like Lighthouse or Chrome DevTools to identify and address performance bottlenecks.
- Testing and Debugging
- Apply styles using CSS, CSS-in-JS libraries like styled-components, or CSS preprocessors like SASS.

SKILLS
