EMPLOYMENT HISTORY

Jun 2024 — Jan 2025

Front-end Developer, Tech Mahindra (Scotiabank)
Toronto, ON , Canada

- Develop and maintain web applications using React JS and Redux Toolkit, utilizing slices and RTK Query for efficient state management.
- Work with **micro-frontend architectures** to build scalable, modular, and independently deployable application components.
- Communicate with backend services via RESTful APIs to fetch, update, and synchronize application data.
- Implement CI/CD pipelines to ensure fast, reliable, and seamless deployment of updates.

Jun 2021 — Jun 2024

Front-end Developer, Pixelbot
Toronto, ON, Canada

- Development and Maintenance of Components using React JS and other related technologies.
- Integration and Communication with APIs
- Translate UI/UX designs into React components, ensuring pixel-perfect implementation and responsiveness.
- Use tools like Lighthouse or Chrome DevTools to identify and address performance bottlenecks.
- Testing and Debugging
